

User Flow Diagram In Multi-Agent Cloud

State Diagram For An Individual Agent In Multi-Agent Cloud

spoken user command

Spoken commands may be anything that the Intelligent Filter can recognize. They may be snippets of text from the content of the message (e.g. "David's flight tomorrow") or they may be commands (e.g. "Delete message") or they may be a combination of commands and snippets (e.g. "Messages from school in the last week that aren't about Tommy or the Bake Sale.")
